"A Royal Prisoner," which is booked for Rhinelander May 8, is a high class romantic drama dealing with the rulers of Russia during the period of 1741. This play is pronounced an excellent piece of work by the critics of Milwaukee. Mr. James who plays the role of Alexis, is a favorite in romantic work, possessing an elegant stage appearance, and should meet with the approval of the Rhinelander theatre goes as a finished artist.

Jack Hagan was called to Maunston last week as a witness in a murder case. A. F. Lynch, a former Onondaga county mill man, was being tried for murdering his father-in-law. Mr. Lynch built the saw mill at Tomahawk Lake, now owned by the Lake Shore Lumber Co., and about six years ago took the gold cure here in Rhinelander. Since then he has been losing in business and his friends claim he is getting deranged.

Little, neglected scratches and wounds frequently result in blood poisoning. Better heal them quickly with DeWitt's Witch Hazel Salve, a thoroughly anti-septic application with a record of always curing piles, old ulcers, sores, cuts, wounds and skin diseases. J. J. REAMON.

G. H. Clark left Friday night for Seattle where he will meet and confer with his partner, T. E. Lennon. Mr. Lennon returned here from Dawson City, Alaska, about two months ago with reports from the gold fields and claims in which he is interested. He remained about three weeks and started upon the return trip but was laid up when he reached Skagway with a severe attack of erysipelas. The severity of the attack caused alarming reports to be sent out regarding his condition, which, however, was not as bad as reported. Owing to Mr. Lennon's weakened condition it was deemed advisable to see him before he proceeded farther and accordingly arrangements were made for a meeting at Seattle this week. It is understood that, in the event of Mr. Lennon not feeling strong enough to continue the trip, Mr. Clark will take his place. Mr. Lennon returning to this city to assume the management of the hardware business in which he and Mr. Clark are jointly interested.

If you suffer from tenderness or fullness on the right side, pains under shoulder blade, constipation, biliousness, sick-headache, and feel dull, heavy and sleepy your liver is torpid and congested. If you have piles, cure them. No use undergoing horrible operations that simply remove the results of the disease without disturbing the disease itself. Place your confidence in DeWitt's Witch Hazel Salve. It has never failed to cure hemorrhoids. It will not fail to cure you. J. J. REAMON.

The big Corliss engine recently placed in position in the electric light station is doing nicely and working to the complete satisfaction of Messrs. Forbes and Watson. The engine is of the Reynolds type and was made by the E. P. Allen Co., of Milwaukee. It does the work of the two engines formerly in use and there is plenty of power to spare. The dynamo is attached to the drive shaft by belts which run on clutch pulleys. The drive shaft is raised about four feet from the floor and is supported by iron stanchions imbedded in cement and stone.

People who have once taken DeWitt's Little Early Risers will never have anything else. They are the "famous little pills" for torpid liver and all irregularities of the system. J. J. REAMON.

The Clark-Berg wrestling bout Saturday night resulted in a victory for the strong armed Swede, who easily won the decision. Clark, the local man, did some agile work and showed off to good advantage but the staying qualities and tremendous strength of Mr. Berg were not to be overbalanced by agility that evening. Berg won the first, third and fourth falls, Clark winning the second after twenty-eight minutes work. Berg was challenged by Wm. Allen, of Duluth, a catch-as-catch-can wrestler of considerable repute, after the second bout, and the challenge was accepted. The match will be catch-as-catch-can style, best two falls in three. Police Gazette rules to govern and will take place at the Grand opera house this (Thursday) evening.

The Best in the World.
We believe Chamberlain's Cough Remedy is the best in the world. A few weeks ago we suffered with a severe cold and a troublesome cough, and having read their advertisement in our own and other papers we purchased a bottle to see if it would effect us. It cured us before the bottle was more than half used. It is the best medicine out for colds and coughs.—The Herald, Andersonville, Ind. For sale by Anderle & Hinman.

WOMAN—A STUDY.

Woman, woman, woman! Tell us, are you still or human? Or a thing that has been sent from afar? We've thought about you, sighted about you.

Fourth about you, cried about you, stayed on nights and nights about you, puzzle that you are.

Just when we would dream we've got you figured out, as like as not you Leave us to-day, to-morrow, guessing what to say or do.

Now we hate you, then we love you, Now we hate you, then we love you, But our three are stale unless you keep us in a stew.

Some there are who really dread you, Some who long to woo and wed you, Some would tell you forever to a distant land: Artists paint you, poets verse you, Scholars praise you, cynics curse you, But "for better or for worse" you still are in demand.

There are times you sadly vex us, Puzzle, plague us and perplex us, Till we wish you were in Texas, very far away.

But, although we sadly doubt you, You're such a womanly woman, You can never do without you, so we let you stay.

—Nixon Waterman, in L. A. W. Bulletin.

The Candidate's Daughter

IT IS a pleasant conviction of old age that the affairs of the world are not quite so important as they were a few years ago and that the ability for conducting them is going back instead of advancing. This commentary is suggested by the experience that the old political campaigner was relating to some of the legislative friends when they met at the hotel.

"I don't suppose," said the veteran, "that the like ever happened in Michigan, before or since. There was a romance involved, some of the greatest men the nation ever produced took a hand, a whole community was divided by the bitterest factional war, the career of an ambitious congressman was suddenly terminated, and yet the little federal position involved was not worth over \$100 a month, if that much. It was a sort of a bloodless political duel, and I know of at least one participant that would rather have stood up and been shot at than to have lost."

"It was right out here in the country where I was raised and brought up. There were only two prominent aspirants for the little office, but their rivalry had stirred the town into a flutter of excitement from center to circumference. I think political interest is more general in the country than in the city, and in those days the individual was more assertive, more appreciative of the supreme rights of citizenship, because he had not been suppressed by machines, combines, rings and bosses as he is now. The churches were internally divided on this issue, social bees were turned into debating societies where feeling ran high, the war was carried into the local paper by heated correspondents, the store and the post office were largely monopolized by the disputants, and some very old friendships were strained to the uttermost."

"I was very much infatuated with the pretty daughter of my candidate. Now that I can view the situation more calmly I realize that he was my candidate because she was his daughter, but wild horses couldn't have drawn such a confession from me at the time. His opponent also had a pretty daughter, and she, too, had an admirer, who was a staunch supporter of her father in his time of political need. These two girls were rival belles, and Tom Harter and I were regarded as among the most effective political herdsmen in that locality. You can understand how much feeling could be stirred up with such elements of discord. Farmers neglected things at home to wrangle or to listen to others wrangle. Some of the women quit speaking and said very unkind things of each other. The young people were as distinctly divided as though lined up in opposition at a spelling school, and there was more genuine temper displayed than in any presidential campaign we had ever gone through."

"Now, I was not alone in my admiration for the daughter of my candidate. There were others, and several of them. I had never felt secure enough to venture a proposal, and was passing through a very trying period of uncertainty. One afternoon as I was walking rapidly by her house I found her leaning over the gate and looking disconsolate enough to cry. 'Tom Harter's going to Washington to-morrow,' she said abruptly. 'You know what that means?'"

"Lovers think quickly, when capable of thinking at all. I should think he would go under the circumstances. It's his duty."

"Then I suppose father might as well draw out, and there were tears in her lovely eyes. 'O, if I were only a man!'"

"I'm thankful you're not," I laughed, and there were two of us leaning on the gate. 'I'm going to tell you something that I have never confided to another person.' This was strictly true, for I had never thought of it till that minute. 'Please don't mention it to a living person, not even to your father, for it might defeat all our plans. I go to Washington to-night, Harter. I have everything ready. I'll take the train from the side opposite the platform, and no one will be the wiser until some time to-morrow. Did it ever enter that the little head of yours that I'd allow Tom to get the start of me or give you anything to cry over?'"

"Her eyes sparkled, roses came to her pale cheeks as if by magic, she turned a glad face toward me and—well, who wouldn't? In my eagerness I had perpetrated a regular schoolboy smack and a frightened robin darted out of the cherry tree over our heads. Keep in mind that we were leaning over the same gate. It was the first time, too. 'Well, I went through to Washington

as fast as steam would carry me, and lost no time in hunting up the congressman from my district. He promised so much and did it with so little apparent consideration that I did not place much dependence upon his assistance. I thought of the girl I left at the gate, took courage of love and went right to the postmaster-general. There, that comes of being rusty on politics. I did not mean to tell what position I was trying to have filled, but even that will not identify the town or the candidates. It happened that the secretary of state was sitting with the postmaster-general, and I suppose that the latter wanted to make an impression. I stated my case to him as concisely as I could, telling him of the central location of my candidate's place of business, his loyalty to the party, his fitness for the position and of the important fact that his appointment would be a great favor to me."

"The general answered with a snarl that he made little attempt to conceal. He would be delighted to do me a personal favor. It would be a downright pleasure for him, but he did not see that the interests of the nation were seriously involved in this little appointment, and he would withhold his decision. Whatever that might be, he hoped that I would keep in mind the fact that he was postmaster-general."

"I managed to tell him that the fact did not strike me as an unalloyed blessing, and thought that I saw a pleasant twinkle in the eye of his distinguished caller. I went away mad and disheartened. Suddenly Senator Zach Chandler came to my mind. He was a friend of my father, both were from New Hampshire, and whenever the great leader was in our section of the state the two men would have a good time talking over the old home state. I went to the senator, telling him everything but the gate episode and the other party thereto. He knew me when I entered, for he never forgot names or faces. He inquired particularly after my father, expressing his regard for him as an old friend, and was in a mood to favor any reasonable cause I might espouse."

"So he tried to squeeze you, did he?" and the old war horse's face had its sternest setting. 'Wanted to show off at the expense of one of my friends and constituents, did he? Just drop this matter and meet me here at eight this evening. That will let you out of the city to-night if you want to go.'

"I was on time and Chandler handed me a commission for my candidate. He stopped my thanks to ask me if it would inconvenience me to remain over till the next day. I was burning to get home with the glad tidings, but I would have given him a month, had he asked it. 'Then take this to the postmaster-general, tell him that his treatment of you was inexcusable, that Michigan men do not permit such attempts to humiliate them, that he told you to remember that he was postmaster-general, and that you now ask him to accept notice that the state of Michigan has been removed from his immediate jurisdiction.' I followed instructions, and, while I do not know what that message from the president, sent to the general through Chandler and myself, contained, I do know that he wilted and stammered an apology. I also know that Chandler was the man after that who said who might hold post offices in this state."

"I gave that commission to the girl who came running down to the same gate to meet me, and when I promptly attended to another little matter of business she said she would marry me a thousand times if it was going to make me so happy. Harter had to wait three years before his girl became good-humored enough to accept him." —Detroit Free Press.

The Pig and His Cane.
In the number of the Tatler for October 6, 1709, it is observed that "a cane is part of the dress of a pig" (this, by the way, shows the erroneous notion prevalent that "priggishness" is a modern word) "and always worn upon a button, for fear he should be thought to have an occasion for it or be esteemed really and not genteely a cripple." In the number for November 13 a rural squire in town is sketched who is the prototype of one of the pavement nuisances. "His arms naturally swung at an unreasonable distance from his sides, which, with the advantage of a cane that he brandished in a great variety of irregular motions, made it unsafe for anyone to walk within several yards of him." And under date of December 5 there is an amusing sketch of "a lively, fresh-colored young man" who was among the applicants to Isaac Bickerstaff's Court of Censorship for license to use "canes, perspective glasses, snuffboxes, orange-flower waters, and the like ornaments of life."

This young man had his cane hanging on his fifth button, and was "an Oxford scholar who was just entering the Temple." —Gentleman's Magazine.

"The Little Minister's" Church.
The Auld Licht church at Kierriemuir (Thurso), Scotland, made famous by J. M. Barrie, seems to have fallen upon evil days. William C. Conn, the "little minister," has resigned because the older members of his congregation said he was "too broad," having preached in the pulpits of other denominations. Although the prophytery acquitted him of all blame, Mr. Conn could not be persuaded to remain. There are, by the way, only 27 churches in Scotland and two in Ireland which are now included in the "Synod of United Original Seceders," a fact which reminds the Philadelphia Press of the reply made by an old Scot when asked about the welfare of his church: "Well," he said, "ye ken it this way; first, there were a hunder o' us. Then there was a schism o' us' left but fifty. An' then there was a heresy trial which took awa' twenty-five. Then a desecration left only my brother Donald an' myself—an' I have sair doubts o' Donald's orthodoxy." —Detroit Free Press.

ELECTRICAL TERMS.

They Are Simple Enough, Says an Authority, Once You Get the Hang of Them.

A consulting electrical engineer, who was asked to put one of the less common electrical terms in plain language, said: "I am frequently resorted to for just such explanations, and nothing surprises me more than the laziness which still exists in the minds of even intelligent folks in regard to the simplest electrical terms. To most people the electrical units are still more Greek, and comparatively few go to the trouble to take hold of the more common of them, such as 'volt,' 'ampere,' 'resistance,' 'electro-motive force,' etc., and fix their meaning, once for all, in the mind. A man who knows me only by reputation wrote to me the other day that he had done this with much satisfaction to himself, as he has now a far more intelligent idea of electrical doings than he had before. But still, he said, from time to time some electrical words creep into the daily press, which conveyed nothing to him. He mentioned as one of these, the term 'watt hour.' Now, this is quite simple. The watt is the unit of electric power. It means the power developed when 4125 foot-pounds of work are done per minute, or 775 foot-pounds per second. A foot-pound is the amount of work required to raise one pound vertically through a distance of one foot. When this is figured down so as to be defined in 'horse-power,' which is understood by everyone, it can offer no difficulty, and if anyone to whom the word watt is puzzling will remember that a watt is the 1/746th of a horse-power he will have no more uncertainty about it. Having gotten so far, it is an easy graduation to the 'watt hour,' which is the term employed to indicate the expenditure of an electrical power of one watt for an hour. In other words, the energy represented by a watt hour is equal to that expended in raising a pound to a height of 2,544 feet. An even easier way of fixing it is to remember that two watt hours correspond almost exactly

to raising a pound to a height of one mile. The understanding of such terms opens out some very curious facts to the uninitiated. For instance, a certain dry battery, weighing 6.25 pounds was known to yield 120 watt hours. If this force were applied to raising the battery itself, it would lift it to a height of over ten miles. Again, in one hour the energy translated in an ordinary 16 candle-power lamp weighing about an ounce would raise that lamp to a height of 40 miles at a velocity of nearly seven miles per minute. Yes, it pays a man to expend a little pains on mastering the ordinary electrical terms."

Sunlight and Health.
Sunlight, says the Lancet, has a well-known effect upon the life of pathogenic organisms. Direct sunlight will kill tubercle bacilli in a few hours or perhaps in a few minutes; whereas they will live for days if exposed to a very strong diffused daylight. The exhilarating effect of a burst of sunshine in the spring is probably not due to mere luminosity, but to an increased active action, a chemical action which we cannot very well explain, but which everyone feels. In estimating, therefore, the value of a health resort, the amount of this active value in the sunshine ought to be taken into account, not less than the number of days upon which the sun shines during the month or the year.

A Large Timber Cradle.
An immense timber cradle has been under construction at Seattle, Wash., during the past three months, and the last section of the old-looking craft was launched on March 20, and will be placed in position to receive the first cargo in a few days. It is thought that the cradle will have a capacity of 2,000,000 feet of lumber. Many lumber shippers are afraid the craft will never reach San Francisco, its destination.

No old-time doctor discards the medicine which can show an unbroken record of

Fifty Years of Cures.

To those doctors, who went up and down the country in every kind of wind and weather, faithful, patient, and true, Ayer's Sarsaparilla owes its first success. Today any doctor of repute who prescribes any Sarsaparilla prescribes Ayer's. We have thousands of testimonials from doctors all over this land that it is the one safe Sarsaparilla, and the doctors know what it is, because we have been giving the formula of it to them for over half a century.

This is why

is "the leader of them all," not because of much advertising nor because of what we put around the bottle, but because of what is in the bottle.

It is the one safe spring medicine for you.

The Dark Secret.
"It's not dark enough yet," she whispered, as she peered eagerly up and down the street.
"There's no one in sight," he replied, after a careful survey.

"Well, then, we'll wait a bit."

The Natural Cure for Indigestion.

Do you have pain in the stomach after eating? Do you have a yellow tongue? Wind on the stomach? Constipation? These things arise from Indigestion and Dyspepsia. Digestion depends on digestive fluids or "ferments" secreted by certain glands. When the secretion becomes insufficient, Indigestion results. Dr. Williams' Pink Pills for Pale People cause these glands to resume their normal action and good digestion follows. Artificial ferments (of which most so-called Dyspepsia cures are composed) may give temporary relief, but Dr. Williams' Pink Pills for Pale People afford a permanent cure.

Poor digestion often causes irregularity of the heart's action. This irregularity may be mistaken for real, organic heart disease. A case in point: Mrs. Ellen Colson, Newport, Ark., had suffered for many years with so much trouble. The cause was the indigestion pressed on the heart, and caused an irregularity of its action. She had much pain in her stomach and heart, and was subject to frequent and severe choking spells which were most severe at night. Doctors were tried in vain; the patient became worse, dependent, and feared impending death. She noticed that in intervals in which her stomach did not annoy her, her heart's action became normal. Reasoning correctly that her digestion was at fault, she procured the proper medicine to treat that trouble and with immediate good results. Her appetite came back, the choking spells became less frequent and finally ceased. Her weight, which had been greatly reduced, was restored and she now weighs more than 80 years.

Do others may know the means of cure we give the name of the medicine used—Dr. Williams' Pink Pills for Pale People. These pills contain all the elements necessary to give new life and richness to the blood and restore shattered nerves. —New Era, Greensburg, Ind.

French word makers are now engaged in trying to coin a sufficiently scientific sounding name for the peculiar phase of insanity developed by the Dreyfus agitation. Twenty-five persons afflicted with the Dreyfus mania have recently been admitted to Paris insane asylums. From other French cities there come similar reports.

The phenomenon of ice freezing on the surface of Lake Champlain in warm weather, when it rarely or never freezes in winter, was reported the other day. The steamer Stehlikia encountered thin ice covering a large surface of the lake four or five miles above Lakeside on her down trip. The fact is sufficiently vouched for by credible witnesses.

REV. DAVID MACRAE, of Dundee, Scotland, now on a visit to this country, says: "Thirty years ago I paid a visit to Mrs. Stonewall Jackson at her home, and was presented by her with the overcoat which her husband wore when he received his death wound. It was a heavy rubber-faced garment, and the fatal bullet hole and stains of blood were plainly visible."

GREYSTONE, the country residence in which Samuel J. Tilden took such pride, will be sold at auction early next month. The sale is the outcome of a suit in partition brought in behalf of the Tilden heirs, and several parcels of city property will be put under the hammer at the same time. Mr. Tilden's city residence, 14 Gramercy park, will be sold at the same time.

It has been stated that every piece of land between the King William statue and Trinity square, London, E. C., cost 1,000 guineas a yard. This would mean about \$117 per square foot, or over \$5,000,000 per acre. The ground in the vicinity of the bank of England is estimated to be not worth less than \$2,000,000 per acre. Land in Pall Mall has changed hands at \$500,000 per acre.

THERE is a new rival to the chamois skin vests so long worn by women for extra warmth. These new vests are of paper. Those who have worn them pronounce them less bulky, just as warm and less expensive than the chamois. They are so cheap, indeed, that they can be thrown away and a new one purchased without troubling the conscience of the woman with only a moderate purse.

At a recent meeting of the Academie des Sciences, Paris, M. Marey presented a new photograph which speaks so distinctly that one can scarcely recognize any difference between the original voice and its reproduction. On the same occasion M. Dussard described a new method of amplifying the sounds of the phonograph just as a photograph is enlarged. It is done by causing the phonograph to speak into a second phonograph having a cylinder of larger diameter.

MAURICE GRAU is a very happy man. At the first annual meeting of stockholders of the Maurice Grau Opera Co., which was held the other afternoon at the Metropolitan opera house, he was able to report that the profits of the opera season just closing would not be less than \$100,000, and to announce that the board of directors had declared a dividend of 25 per cent. on the \$125,000 common stock, including the 5 per cent. required by the by-laws to be paid on the investment.

SIXTY-ONE men were kept busy serving the wines and mineral waters at the Croker \$10 dinner in New York a few days ago. They had nothing else to do while the banquet lasted, and this was fortunate, for their time was fully employed in dispensing the 2,000 quarts of champagne, and the 2,000 quarts of other kinds of wine. Of all this, it was affirmed at the close of the banquet, not a drop was left. The 2,400 quarts of mineral water, however, proved more than ample.

PERSONS who are compelled to make use of public drinking fountains may relieve their minds to a great extent of fear of infectious microbes by supplying themselves with a lip guard and protector which has been recently patented by Alrah C. Tebbets, of Boston. It is merely a metal or rubber shield which slips over the edge of the drinking glass and is held in place by the natural spring of the material. This prevents one's lips from coming in contact with the edge of the glass, and thereby prevents infection.

THE Norost, of St. Petersburg, gives a description of roses that are jet black in color, and which are the result of ten years' toil and thought by a florist named Fetisov, in Woronesch, Russia. This man has produced some remarkable effects in the garden world. His latest success with the black roses has stirred up quite a sensation among the lovers of flowers in Russia. Some specimens were sent to the czar by Fetisov, and a beautiful collection of them has been sent to London to be exhibited at the coming annual flower show.

THE new Havana police force is having a great deal of trouble. Scarcely a night passes without the killing of one or more policemen, citizens or soldiers. The Cuban is too excitable, too nervous to make a good policeman. It will not be long before the American police will have to begin policing the streets again. Although there are strict orders against selling any intoxicating drinks to the soldiers in Havana, the men get liquor some way, and one drunken soldier or sailor will make things remarkably interesting for three or four of the Cuban police men.

TERRIBLE WORK OF A MOB

The Members of a Lynching Party in Georgia Revenge a Crime in a Fiendish Manner.

THEY BURN A COLORED MAN AT THE STAKE

Before the torch is applied to his ears and fingers are cut off and his body saturated with oil—spectators fight to secure a ghastly relic of the scene.

Newnan, Ga., April 24.—Sam Hose, the member of Alfred Cranford and the ravisher of his wife, was burned at the stake two miles from here at 2:50 Sunday afternoon in the presence of 2,500 people.

Before the torch was applied to the pyre, the negro was deprived of his ears, fingers and other portions of his anatomy. The negro pleaded pitifully for his life, while the mutilation was going on, but stood the ordeal of fire with surprising fortitude. Before the body was cut, it was cut to pieces, the bones were crushed into small bits and even the tree upon which the wretch met his fate was torn up and disposed of as souvenirs. The negro's heart was cut in several pieces, as was also his liver. Those unable to obtain the ghastly relics direct, paid their more fortunate possessors extravagant sums for them. Small pieces of bone went for 25 cents, and a bit of the liver, crisply cooked, sold for ten cents. As soon as the negro was seen to be dead there was a tremendous struggle among the crowd which had witnessed his tragic end to secure the souvenirs. A rush was made for the stake, and those near the body were forced against it, and had to fight for their freedom. Knives were quickly produced, and the body was soon dismembered.

The mob was composed of citizens of Newnan, Griffin, Palmetto and other little towns in the country round about Newnan, and of all the farmers who had received word that the burning was to take place. One of the men who lifted the can of kerosene to the negro's head is said to be a native of the commonwealth of Pennsylvania. His name is known to those who were with him, but they refuse to divulge it.

Tried to Shoot His Governor.

Hon. W. Y. Atkinson, former governor of Georgia, met the mob as he was returning from church and he appealed to them to let the law take its course. In addressing the mob he used these words: "Some of you are known to me, and when this affair is finally settled in the courts you may depend upon it that I will testify against you." A member of the mob was seen to draw a revolver and level it at Gov. Atkinson, but his arm was seized and the pistol taken from him. The mob was frantic at delays and would hear to nothing but burning at the stake.

Made a Partial Confession.

Hose confessed to killing Cranford, but denied that he had outraged Mrs. Cranford. Before being put to death the negro stated that he had been paid \$12 by "Lige" Strickland, a negro preacher at Palmetto, to kill Cranford. Sam Hose killed Alfred Cranford, a white farmer, near Palmetto and outraged his wife ten days ago. Since that time his wife ten days ago. Since that time his wife ten days ago. Since that time his wife ten days ago.

Two Women Murdered.

St. Louis, April 24.—A special to the Republic from Murphysboro, Ill., says: In a house near Mount Carbon Mine No. 6, in a lonely strip of woods, the bodies of two murdered women were found Sunday. They were Mrs. Mary E. Dufre, wife of a miner, and Miss May Millstead, a friend who had been staying with Mrs. Dufre during her husband's absence. Both had evidently been shot and then struck with a club. The house was plundered. It is believed the murder was committed Friday.

Dead of Insane Patient.

Yuba City, Cal., April 22.—Richard Willis, insane, confined in the county house, managed to fire the building, and was himself burned to death. The county jail adjoining was also completely destroyed. There were no prisoners in the jail. Most of the county records were saved. The loss will amount to about \$10,000, well insured.

No Plague at Paris.

Paris, April 22.—The police officials announce that there is utterly no foundation for the report, circulated by the Fronde of this city, that three cases of the plague have occurred among the employees in one of the big stores of this city, to which the disease was alleged to have been brought in carpets of eastern manufacture.

Children Burned.

Berne, Ind., April 20.—The orphan's home here burned yesterday and Katie Littlehaker, 14 years old, of Cleveland, O.; Mamie Bradrick, 15 years old, of Chicago, Ill.; Della Taylor, seven years old, of Linn Grove, Ill., were burned to death.

President May Attended.

Youngstown, O., April 20.—President McKinley has accepted an invitation to attend the state encampment of the G. A. R. to be held here the latter part of June, provided other engagements of an official character do not interfere.

Once Famous Jockey Dead.

that Mr. Reed is guaranteed a yearly income of \$20,000. Before settling down here Mr. Reed will make a protracted visit to Europe.

OUR REVENUES.

They Show an Increase for the Nine Months of the Fiscal Year of Over \$77,700,000.

Washington, April 21.—The monthly statement of the collections of internal revenue shows that during the month of March, 1899, the total receipts were \$22,758,447, an increase over March, 1898, of \$9,491,340. Among the special and miscellaneous taxes are the following items: Bankers, \$16,231; circuses, theaters, etc., \$2,570; filled cheese, \$2,261; excise taxes on gross receipts, \$56,425; legacies, \$112,552; documentary and proprietary stamps, \$3,592,100; playing cards, \$20,201. For the nine months of the present fiscal year the total receipts were \$201,222,141, an increase over the corresponding period of last year of \$77,700,000.

Not a Candidate for Re-election.

Washington, April 22.—Vice President Hobart has definitely informed his personal friends here, including President McKinley, that he will not be a candidate for re-election. This decision is due to the ill health of the vice president and the necessity of putting aside as far as possible all cares and responsibilities. It is even doubtful if the vice president will be able to perform his duties next winter as presiding officer of the senate.

Twelve Drowned.

St. Augustine, Fla., April 21.—Considerable excitement was created here early Sunday afternoon by a small boat out at sea giving signals of distress. Capt. Allen immediately went to its assistance in the yacht Halvian. Upon reaching the boat he found it to be the missing lifeboat of the steamer Gen. Whitney, which foundered north of Cape Canaveral during Friday night. The other lifeboat was swamped in the surf and 12 men drowned.

Tragedy in Wisconsin.

Phillips, Wis., April 22.—Michael Bartemus, who lives a short distance from this city, attempted to murder his wife by shooting Friday. He then turned the weapon upon himself, inflicting injuries which caused his death. Mrs. Bartemus is suffering from a severe flesh wound and will recover. Domestic trouble was the cause of the tragedy.

Taken Issue with the Governor.

Washington, April 21.—President McKinley has received a letter from Lieut. Gov. John T. Kean, of South Dakota, strongly opposing Gov. Lee's demand for the recall of the South Dakota volunteers from Manila, and asserting that the governor does not represent the true sentiment of the state.

Exchanges.

New York, April 22.—The exchanges at the leading clearing houses in the United States during the week ended on the 21st aggregated \$1,573,962,451 against \$1,212,923,423 the previous week. The increase compared with the corresponding week in 1898 was 77.1.

Ex-Congressman Dead.

Norwich, Conn., April 22.—Ex-Congressman John T. Wait died at his home in this city, at the age of 83 years. Death was due to old age. Mr. Wait was a republican member of the Forty-fourth and Forty-fifth congresses.

Montevideo, April 20.—Members of the Belgian antarctic expedition who arrived here report the discovery of land previously unknown, which they named Danco.

New Senator.

Tallahassee, Fla., April 20.—The legislature yesterday elected James P. Tallaferra (dem.), of Jacksonville, United States senator.

TROOPS SUFFER HEAVILY.

Col. Stotsenburg and Six Other Americans Stain Near Malolos by the Insurgents.

FORTY-NINE MORE ARE BADLY WOUNDED

Battle the severest and most disastrous since fighting in the Philippines began—Natives flee from their breastworks with slight loss—Will have revenge.

Manila, April 21.—In an encounter with the Filipinos Sunday near Quinua, about four miles northeast of Malolos, seven Americans were killed and 49 wounded. The following were killed: Col. John M. Stotsenburg, of the First Nebraska cavalry, formerly of the Sixth cavalry; Lieut. Sisson, of the same regiment; Two privates of the Nebraska regiment. Three privates of the Fourth cavalry. Most of the wounded belong to the First Nebraska regiment.

The Filipinos retreated with small loss. Disastrous but Successful. The engagement developed into a disastrous, though successful, fight. The insurgents had a horse-shoe trench, about a mile long, encircling a rice field, on the edge of a wood. Maj. Bell, with 40 cavalrymen, encountered a strong outpost. One of his men was killed and five were wounded by a vol-

ley. The Americans retired, carrying their wounded under fire and with great difficulty, being closely pursued, a fog enabling the enemy to creep up to them.

Brave Officer Killed.

Finally the Second battalion arrived, and then Col. Stotsenburg, who had spent the night with his family at Manila, came upon the field. The men immediately recognized him and raised a cheer. Col. Stotsenburg, deciding to charge as the cheapest way out of the difficulty, led the attack at the head of his regiment. He fell with a bullet in the breast, dying instantly, about 200 yards from the breastworks.

Lieut. Sisson fell with a bullet in his heart, the bullet striking him near the picture of a girl suspended by a ribbon from his neck.

In the meantime the artillery had arrived and shelled the trenches. The Filipinos stood until the Nebraska troops were right on the trenches, and then they tolled to the second line of intrenchments, a mile back.

The Nebraska regiment lost two privates killed and had many wounded, including two lieutenants. The Iowa regiment had several wounded. The Utah regiment had one officer and three men wounded.

Thirteen dead Filipinos were found in the trench. Their loss was comparatively small on account of their safe shelter.

The Americans carried the second trench with small loss and are now holding the town.

Will Have Revenge.

The loss of the Nebraska regiment in the campaign is the greatest sustained by any regiment, and Sunday's disaster has greatly saddened officers and men, who promise to take fierce vengeance in the next fight.

Col. Stotsenburg has won a reputation as one of the bravest fighters in the army. He always led his regiment and had achieved remarkable popularity with his men since the war began, although, during his first colonelcy, the volunteers, who were not used to the rigid discipline of the regular troops, thought him a hard officer.

Dewey Still in the Dark.

Washington, April 21.—From a dispatch received by Secretary Long from Admiral Dewey Sunday, it is evident the latter is still in the dark respecting the whereabouts of Lieut. Gilmore and party, of the Yorktown, who, it is thought, were ambushed and captured by a party of Filipinos while on a voyage to rescue Spanish prisoners near Iloilo. The Admiral says he is endeavoring to ascertain the situation of the lieutenant and his party.

In the Field Again.

Manila, April 21.—Gen. Lawton

took the field at daybreak Saturday, with a column of troops consisting of the North Dakota regiment, two battalions of the Third infantry, the Twenty-second infantry, two guns of Scott's battery, three troops of the Fourth cavalry and Gale's squadron, equipped in light marching order. This force started at five o'clock in the morning over the Norvaliches road, traveling the country previously cleared of rebels, but subsequently reconquered by them. It is to be presumed that Gen. Lawton by this movement will outflank the enemy before joining Gen. MacArthur north of Malolos.

TAKES HIS OWN LIFE.

Col. M. L. Clark, the Turfman, Shoots Himself at Memphis While Suffering from Melancholia.

Memphis, Tenn., April 21.—Col. M. L. Clark, of Louisville, the well-known racing judge, committed suicide here in his room in the Gaston hotel while suffering from melancholia.

Col. Clark was one of the most notable figures of the American turf. Over 25 years of his life were devoted to it, during all of which no breath of scandal has ever assailed his name. He was the author of a majority of the turf rules or laws of the present day and the founder of the first American turf congress.

Washed Hopes.

In moody silence, with lowering brow and folded arms, the young man stood before her. He was a returned soldier, a volunteer officer, honorably discharged from the service of his country.

He had come back, as he supposed, to make the dear girl happy who had hung upon his neck when he bade her good-by to go to the wars.

But the dear girl had received him coldly. A bustling commercial traveler had taken advantage of his absence and supplanted him in her affections.

"So!" he said, at last. "You have no remorse for your faithlessness?" "None whatever," she replied. "You prefer that chap with the sample case to me, do you?"

"Hatter!" He drew himself up stiffly. "Miss Gertrude 'Corkin,' he said, 'I leave this house forever. I leave it,' he added, picking up his hat, 'drummed out, but not drummed out!'"

And as he marched out of the room with a military step the heartless girl called out "Left! left! left! left!" after him.—Chicago Tribune.

GREAT DAY FOR MR. QUAY

Is Declared Not Guilty of Criminal Charges—Appointed Senator by Gov. Stone.

HE IS THUS COMPLETELY VINDICATED.

Demonstration Presented in Courtroom, but Outside the Friends Gave Vent to Their Satisfaction—Urge to Prosecute His Enemies—Hearings Upon Which He Was Tried.

Philadelphia, April 22.—Matthew Stanley Quay was Friday declared by a jury of his peers to be not guilty of the charge of conspiring to use for his own unlawful gain and profit the funds of the state of Pennsylvania deposited in the People's bank of this city. This verdict was announced by the foreman of the jury just as the hands of the courtroom timepiece pointed to 11

SENATOR MATTHEW S. QUAY.

O'clock. At the time the jury came filing into their places there were comparatively few people in the courtroom.

Demonstration Presented. There was an attempt at a demonstration, but this was sternly repressed by the court officers, whose loud shouts of "Order," "Order," "Silence," were effective in silencing those jubilant spirits who wished to give vent to their satisfaction by cheering. The officers were unable, however, to keep back those who struggled to get to Senator Quay and congratulate him. Chairs were upset, tables were brushed aside and hats were smashed by the onrushing crowd. Senator Quay, with a broad smile on his face, responded pleasantly to the greetings and congratulations of those who crowded around. A few of his political friends were there, and these men were loud and sincere in their expressions.

Cheers Outside the Courtroom. Although the court officers prevented the cheering in the courtroom, their jurisdiction did not extend to the corridors of the city hall, and the first group of men who left the courtroom sent up a mighty shout, which was taken up and repeated by the crowds gathered just outside the "dead line" drawn by the watchmen, beyond which only possessors of tickets were allowed to pass.

Senator Quay walked with his friends one block down Broad street to the office of his counsel, where he made his escape from the surging crowd. It is understood that he will at once join his family in Washington and will probably go away for a long rest.

The Remaining Indictments. After the crowd left the courtroom, District Attorney Rothman was questioned regarding the remaining indictments. He said there are three of them and they are still pending, but he would not say what his course will be regarding them.

Political friends of Senator Quay are urging him to bring criminal prosecutions against those enemies who they claim are behind the prosecution of their favorite, but the senator will not indicate what his course in this respect may be.

The Quay Charges. The charges against Senator Quay followed the collapse of the People's bank in March, 1904, and the examination of its books by a receiver. The warrants were issued in the following October and included besides Mr. Quay and his son, the names of Charles H. McKee, a Pittsburgh lawyer, and State Treasurer Benjamin J. Haywood. On November 21 the grand jury found true bills against all but McKee. The suicide of Cashier Hopkins just prior to the bank's failure, prevented his coming within the scope of criminal action. The indictments were five in number. Three were reduced to four by the death of Mr. Haywood on February 23 of this year. One week after true bills had been found against Mr. Quay and the other defendants fled demurely to four of them and a man to quash the fifth. Judge Elliott on December 1 decided against the defendants. Counsel then carried the case to the supreme court, on the plea, among other contentions, that the prosecution was actuated by political motives which would prevent an impartial trial in this country. The supreme court decided to interfere. The trial was set for February 20 and was postponed until the 27th when it was again postponed until Monday of last week.

Appointed United States Senator. Harrisburg, Pa., April 22.—Immediately on receipt of the news that Matthew S. Quay was acquitted of the charges against him, Gov. Stone appointed him United States senator to fill the vacancy until the next legislative meets, and notified Vice President Hobart as follows:

"Sir: By virtue of the power vested in me as executive of the state of Pennsylvania, under article 1, clause 2, section 2, of the constitution of the United States, I hereby make temporary appointment of Hon. Matthew Stanley Quay to be United States senator from Pennsylvania to fill the vacancy now existing in this state. Very respectfully,

"WILLIAM A. STONE,
"Governor of Pennsylvania."
Gov. Stone said that in appointing M. S. Quay he felt that he had done the fit and proper thing. He thought it would make the issue and is better done now than by waiting for weeks.

The authority cited by the governor says that the governor of any state may make temporary appointment during a recess to hold until the next legislative meets.

SNAKE COLLECTIONS.

Washington Has One of the Very Best in the World.

Early Reptiles from Africa, Asia and America to Be Seen in Our Famous National Museum.

[Special Washington Letter.]

Who is afraid of snakes? Above all others of human kind the women have the greatest dread of reptiles. Whether this instinctive feeling comes of the experience in the Garden of Eden, or not, each of us must conjecture. The fact is generally conceded.

A poet once said, that "woman, though only a part of man's rib, if the story in Genesis don't tell a fib, caused Adam to sin, and serpents to crawl, and folly to follow the lives of us all."

The story in Genesis says that the serpent was more subtle than any beast of the field, and that the serpent tempted the woman, who tempted the man, so that they ate of the tree of knowledge of good and evil; and they were expelled from the garden "lest they take also of the tree of life, and eat, and live forever."

The penalty placed upon the serpent, the original tempter was, "Because thou has done this, thou art cursed above all cattle, and above every beast of the field; upon thy belly shalt thou go, and dust shalt thou eat all the days of thy life."

Eternal enmity was also decreed between the seed of the woman and the seed of the serpent, and from time immemorial there has been this enmity; so that instinctively wherever we see a serpent we proceed to kill it, for it is known to be deadly, subtle and cowardly. Moreover, all women shrink in terror from every species of reptile. Consequently it is the most unnatural thing on earth to see, in traveling shows, the anomaly of women cooing into handling snakes for the delectation of curious crowds.

The modern men of science never give even passing thought to the story of original sin, but study snakes just as they study other phenomena of nature; just as they dissect frogs, fish, cattle and human beings. The scientific men of the national museum and Smithsonian institution have gathered practically every variety of snake on the face of the earth, including prehistoric specimens. The collection has been placed in the northeastern corner of the museum building. There are all sorts of reptiles and creeping things in the gallery nook, and the smell of alcohol and other preparations in which they are preserved is plainly noticeable. The place is dark and gloomy, a veritable chamber of horrors, and a glance at the immense bottles with their loathsome contents is not calculated to inspire confidence in the minds of the beholders, who seem to be figuratively, as well as actually, "seeing snakes."

The scientist in charge of these curiosities recently showed to some visitors a number of species lately received from all over the world, two or three of them being of far more than ordinary interest. One of the reptiles shown, which was secured by the expedition to Liberia, of which Prof. Cook was a member, is a horned snake, an entirely new variety so far as the museum is concerned, and one which

thought to be necessarily fatal to a human being.

The venom of some reptiles is absolutely incurable, no matter how ready and instant may be the attention given. Alcohol taken internally in almost any form will often ward off the evil effects of the poison of common snakes, but no remedy is known for the virus injected by certain colubras and others of the known deadly species. There are on record many cases of sudden death from snake bites; showing that even with immediate amputation of the hand, or foot, or even leg or arm of the victim, death has ensued. The venom courses through the blood like lightning; and impregnates the whole system so speedily that amputation of the first-affected part cannot save the life of the individual stricken.

In terrestrial it is not customary to classify ants with reptiles; but they are so classified here, and some of the specimens show that they are properly classified in this collection. Notably are the gigantic white ants which have been found in Liberia and sent to the scientists of the institution. They are of different sizes, comprising "soldiers," "workers" and "queens." One of the latter shown was about an inch

long. The jaws of the workers are powerfully developed. Some varieties of the ants build mounds as high or higher than a man, in which they live. A member of the expedition told the writer that he threw a rat in among a lot of them on the march, and in a few minutes only the bones were left, the flesh having been removed by the creatures. If a person gets in their way in the forest they make things lively for him.

One of the greatest curiosities in the reptile line comprised in that collection is a Florida rattlesnake of the "diamond" variety, about 6 1/2 feet in length and nine inches in circumference. The scales of the "rattler" are like those on a large fish, and its head is as large as a man's fist.

It must have been in life, as it is now in alcohol, a terribly repulsive object, and a most formidable one to meet in combat. The specimen was the largest of the rattlesnake variety ever seen by any of the persons connected with the department. The poison fangs, which are located in the upper jaw, are nearly half an inch in length, and are hooked, being as sharp as needles. There are two of them, sometimes three, and there are always what are known as "supernumerary" ones, ready to take the place of any that are broken or removed.

The fangs of the Liberian viper, or "bitis gabonica," though the snakes are at least one-third smaller, are about as large as those of the giant rattlesnake. Even if there were no poison glands the simple bite would tear a man's hand terribly.

Another specimen which was sent to the museum by Dr. Abbott, the famous Philadelphia explorer, from India, is that of a snake nearly 11 feet in length. Its head is nearly as large as that of a baby. The reptile is regarded as a most curious specimen and one of great interest in the reptile collection.

These snakes constitute a very small portion of the collection; but they are given special mention because they are so specially hideous and dangerous, as well as repulsive. Besides, it would not be interesting to describe the kinds of snake which we have been accustomed to see since childhood, and the rattlers who have lain coiled up under a blackberry bush, warning us in time to get out of harm's way; a warning which we have often rewarded with a club or a barrel of shot from our shotgun.

When you come to Washington by all means look over the snake collection; but come sober and be in your right mind, or else you will be likely to have some one play upon you as some congressman did a few years ago upon one of their colleagues from Tennessee. He had been drinking to excess, and some of his colleagues put him in a cab and drove to the museum. The victim was sleeping when he arrived there, was carried to an easy chair, and permitted to sleep for an hour. When he awakened there was a box constrictor coiled up before him. He howled for help, but nobody came. Casting his eyes to either side, he saw pythons and rattlesnakes coiled ready to strike. He looked in terror about him, not daring to move, but calling for help. Finally, thoroughly convinced that he was suffering with malaria, he shouted: "I've got 'em!" and rushed past the snakes, heading for the door, when he met his congressional colleagues, who assured him that he was in the national museum, and that he was sobering up.

Fortunately the practical joke worked so well that he never has since taken a drop of strong liquor.

Since it is but little more than a month before Memorial Day and nothing has been said about its observance, it is in order to inquire what is to be done on that National Holiday. So far no word appears to have come from the office of a Grand Army man or any other person, as to what will be done in the way of observing the day, whether with appropriate ceremony or even in any way. It would be contrary to the spirit of the Grand Army of the Republic as well as all loyal citizens to let the day pass without proper observance. Has anyone ought to say?

Charles Perry was brought before Municipal Judge Browne yesterday for discharging firearms within the city limits. The charge was preferred by J. Segerstrom whose dog suffered from the lead in the gun. Perry pleaded not guilty, was tried and convicted and sentenced to 20 days' imprisonment in the county jail or \$50.00 fine. Mr. Perry appealed the case.

Died.

John Kearns died at St. Mary's Hospital Monday night after a week's illness. He had been troubled with indigestion for some time but the ailment had not been serious enough to confine him to his bed until about a week prior to his taking off. He was obliged to give up for a few days and was confined to his room at the Onondaga House, but his condition becoming worse it was deemed advisable to transfer him to the hospital, which was done Friday. Here everything possible was done to pull him through but his ailment was of too serious a nature and death ensued Monday.

Deceased was 39 years of age and is survived by a father and mother, a sister and four brothers, one of whom, Mike, is a resident of this city. The remains were taken to Reed City, Mich., for burial Tuesday night.

Take Notice.

F. E. Parker, Uncle Sam's dispenser of mail matter, wishes to inform the public that on and after Sunday, May 7, the postoffice will be open from 9 to 10 a. m. Instead of 11 to 12 a. m. as heretofore. The change will enable Christians to secure their mail before going to church instead of after as has been the custom.

Remarkable Cure of Rheumatism.

Kenna, Jackson Co., W. Va. About three years ago my wife had an attack of rheumatism which confined her to her bed for over a month and rendered her unable to walk a step without assistance, her limbs being swollen to double their normal size. Mr. S. Maddox insisted on my using Chamberlain's Pain Balm. I purchased a fifty-cent bottle and used it according to the directions and the next morning she walked to breakfast without assistance in any manner, and she has not had a similar attack since.—A. B. PAXSONS. For sale by Anderle & Hinman.

Farmers' Institutes for June, 1919.

University of Wisconsin, Madison, Wis., Apr. 15, 1919. We are planning to hold ten Summer Institutes in Northern Wisconsin in June, at points that are too far north to make winter meetings advisable.

If your town has a hall that can be secured in which to hold a one-day meeting, and your farmers and enterprising business men wish a gathering of this kind, write to this office for blank petition.

As only ten of these meetings can be placed it will be well not to delay, but write at once, as the earliest applications will receive the most favorable consideration.

Geo. McKernow, Sup't., Madison, Wis.
